Allowable Subject Matter

1. Claims 1-4 and 10-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: changing guidance level with respect to a player being based on evaluation of game operation of other player, as particularly claimed, in combination with other steps/features appears allowable as remarked in paper rec'd Jan 23, 2004 and July 26, 2004 with following clarification. Applicant remarks in paper rec'd July 26, 2004 assert that 'game operation' is broader than prior language of stepping performance, however, the examiner disagrees with Applicants asserted definition and deems the specification as originally filed supports stepping alone (as previously claimed) but finds no support within specification regarding game operation to encompass stepping in combination with other game activities or other game activities alone without stepping performance at least due to the only evaluation taught, disclosed, implied and inferred therein by one of ordinary skill in the art is with respect to stepping performance. This is neither a statement of indefiniteness of claim language nor lack of written description of claimed subject matter, but it is a clarification of the scope of claim language as supported by originally filed specification since the language is defined and supported therein, but not to the scope as remarked by Applicants. It is also noteworthy that Applicants provided no citation in the originally filed specification that supports the scope remarked in cited filed amendment. When the claim language is considered as a whole in light of the specification without reading in features/steps, one of ordinary skill in the art would interpret the scope of the claimed invention including the language 'game operation' as referring in this case as stepping performance on the controller (see paragraph 10-18 and 36, figs. 2, 11-12). The language 'game operation' has antecedent basis within original specification.

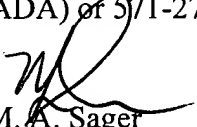

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
